DETAILED ACTION

1. This is in responsive to amendment filed after final filed on 7 December 2004.
2. Claims 1 – 13 are allowed.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
4. Authorization for this examiner's amendment was given in a telephone interview with Mr. Robert McDermott [reg. # 41,508] on December 14, 2004.
5. The application has been amended for correcting wrong dependency for claims 7 – 9 as follows:
 6. In the claim 7 line 1, please change "7" to read ---6---
 7. In the claim 8 line 1, please change "7" to read ---6---
 8. In the claim 9 line 1, please change "7" to read ---6---

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The independent claim 1 is allowable in view of applicant's arguments for the claimed consumption time interval to a measured processing time interval from a turn-on instant until an interruption instant as specifically claimed over the prior art of record and none of the references, either alone or in combination, discloses or renders obvious for time measurement means which are adapted to measure a processing time interval defined as the time interval from the turn-on

instant until the interruption instant, and voltage supply means that are adapted to adapt a consumption time interval to the measured processing time interval.

The independent claim 6, is allowable in view of applicant's arguments for a controller that is configured to decouple a capacitor from a power source at a first time, interrupt a processor at a second time, and discharge the capacitor at a third time, wherein the third time is dependent upon an interval between the second and third times of a prior sequence of interrupting the processor and discharging the capacitor over the prior art of record and none of the references, either alone or in combination, discloses or renders obvious for a third time at which capacitor is discharged based on an interval between the second and third times of a prior sequence of interrupting the processor and discharging the capacitor.

The independent claim 10, is allowable in view of applicant's arguments for Similarly, claim 10, upon which claims 11-13 depend, claims a method of masking power consumption of a processor comprising decoupling an internal power source from an external power source at a first time, interrupting the processor at a second time, reducing the voltage on the internal power source at a third time, and modifying the third time for a subsequent repetition of the method based on an interval between the second time and the third time over the prior art of record and none of the references, either alone or in combination, discloses or renders obvious for modifying a third time at which the voltage on the internal power source is reduced for a subsequent repetition of the method based on an interval between the second time and third time.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
